delv – the smart conference chair.

The innovative, ergonomic design of the *delv* conference swivel chair combines a dynamic seating philosophy with trendsetting kinetics: the new twist-balance mechanism replaces conventional mechanisms and enhances ergonomic performance. It scores with mobility of the seat and back. At the same time, it promotes the micro-movements of the spinal column and stimulates the supply of nutrients to the intervertebral discs. *delv* adapts to its users – thanks to the automatic weight detection. This is of particular advantage during conferences and desk sharing, when several people use the smart conference chair. The combination of top-quality materials, ergonomic innovation and contemporary design makes *delv* the ideal choice for use in prestigious offices.

Inspiringly simple.

“

The ergonomic design of delv combines a dynamic seating philosophy with trendsetting kinetics.

The free play of forces: the twist-balance mechanism. *delv* promotes dynamic sitting – without any additional controls. The twist-balance mechanism combines the advantages of a synchro mechanism and dispenses with the complexity of conventional mechanisms. It makes it possible to detect weight automatically with just a few, flexible components by allowing the kinetic forces of the materials to take effect. A pretensioned spring made of high-strength polymer plastic reacts when you sit down: The more weight the spring is subjected to, the greater the resistance. This automatically regulates the pressure on the backrest and creates an intuitive sitting experience. No fine adjustment is necessary, as the pretension of the spring is designed to adapt to a wide range of users from 50 to 120 kilos.

Design: Andreas Krob

Rich in detail.

Optional.

The welt quilting seam on the outer edges of the seat and back gives *delv* a slim contour – despite the voluminous upholstery, which guarantees excellent seating comfort. Leather pads for the aluminium arms are available on request.

At the push of a button the backrest can be locked in the foremost position.

The pressure on the backrest and the weight setting are regulated automatically. The seat height of the swivel chair can be adjusted manually.

Castors in chrome. The universal twin wheel castors optionally are available in chrome.

Twist-balance mechanism. Balanced dynamic sitting and mobility of the seat and back promote the micro-movements of the spinal column. The supply of nutrients to the intervertebral discs is stimulated and thus the ergonomic effectiveness is increased.

5440 Swivel chair with arms
Seat and back upholstered
H 1055-1170 / SH 415-530 / W 745 / D 745

6204 Conference chair with arms
Seat and back upholstered
H 1050 / SH 435 / W 745 / D 745

H = total height / SH = seat height / W = width / D = depth / dimensions in mm

Standard model:

polished or powder-coated die-cast aluminium swivel base. Universal twin wheel castors, glossy black, Ø 60 mm. Optional: black plastic glides. Upholstered seat and backrest, with welt quilting seam. Powder-coated aluminium arms.

Functions:

twist-balance mechanism for automatically regulated pressure on the backrest and automatic weight detection. Ergonomic mobility of the seat and back for dynamic sitting.

Swivel chair 5440:

seat height adjustment via black gas spring acc. to DIN 4550 and depth suspension.

Conference chair 6204:

rotary mechanism, chrome-plated, not height adjustable.

Against surcharge:

Chromed universal twin wheel castors or felt glides. Polished aluminium arms. Leather arm pads: black leather arm pads for models with fabric or synthetic leather upholstery, for models upholstered with leather the arm pads are similar to the seat and backrest.

Perfect Partners.
