sign_2

Leading the way.

The new multi-purpose chair series *sign_2* is more than a mere facelift of the successful chair classic *sign*. Redesigned and provided with contemporary features it combines creative modernity with highest functional demands: the shape of the chair has been reduced to the "nature of sitting", and complex requirements such as stackability, row function, or diversity of variants have been integrated discreetly in the design concept of the chair.

sign_2 is mainly used in all areas of communication such as training courses, seminars, events, or meetings. The high-grade cantilever version with the slim classic profile has been designed especially for conference areas and as visitor chair in management offices. Conclusion: The new *sign_2* combines enduring elegance with solidity and value without appearing bulky.

In the name of elegance.

sign_2 impresses at first sight by its simple and homogeneous basic form. The plywood back narrowing upward creates a fluent passage from the rear legs to the backrest forming a gentle upward sweep. The same natural movement is reflected by the transition of the back to the armrests, which widen to form ergonomic hand rests

The design concept also includes fine technology and a selection of high-grade materials such as oak, ash, or beech for the plywood backs - available in a number of different stains. Special attention has been paid to seating comfort: the luxury upholstery combined with the elastic and breathable seat suspension forms an ergonomic seat pan offering comfort even after hours of sitting in meetings. The durability of the seat is ensured by the high unit weight of the foam cut to size.

Stacking chair 6830

Seat with luxury upholstery, plywood back,
or fully upholstered
W 500 / D 530 / SH 465 / H 820

Stacking chair with wooden arms 6831

Seat with luxury upholstery, plywood back,
or fully upholstered
